In addition to the above, the PTO has entered into an agreement with a commercial firm to provide the PTO access to and support for the use of a proprietary full-text processing system. Using this system, the PTO will carry out research and evaluation projects dealing with automated full-text searching of U.S. patents. As part of this research the PTO will provide to the commercial firm a special compilation copy of the Retrospective Patent Full Text File and selected portions of the Retrospective Patent Full Text available from NTIS. These files will be available either from the PTO or NTIS depending upon the level of interest in obtaining copies.

The special compilation copy of the Retrospective Patent Full Text File is identical to the Retrospective Patent Full Text File available from NTIS with the exception of the addition of a discipline category indicator which identifies patents issued in (1) chemical, (2) electrical, (3) mechanical, (4) chemical and electrical, (5) electrical and mechanical, (6) chemical and mechanical, or (7) other art areas. The initial file will contain patents issued through Feb. 24, 1981 and will be updated for a period of approximately one year. There are no current plans to provide updates beyond this one year period.

The selected portions of the Retrospective Patent Full Text File, consisting of six separate files, are as follows:

File Name	Class	Subclass	Approximate No. of Patents
